

STANDARDS FOR OPERATIONS PROTOCOL IN COVID-19.

First and foremost, please know that CBD Hotel is focused more than ever on the health and safety of our guests – your wellbeing is our top priority. Hygiene and cleanliness have never been more important to us – we believe that hotels can never be “too clean.”

First, we have put in place enhanced safety practices at the front desk and in the lobby. We measure your temperature upon arrival. We are minimizing your contact with personnel – streamlining check-in and check-out processes. We practice social distancing by ensuring a safe distance for interactions, and we disinfect anything you will touch – from the front desk surface to the pens you use. Every key card is disinfected and sanitized with appropriate cleaning agents. We have removed lobby items that in the past would have been shared by guests (such as magazines and newspapers) and we have established strictly enforced cleaning schedules for lobby furniture and fixtures. We have hand sanitizing stations in the lobby and beverage stations include napkins that should be used when dispensing your beverage. Noting you will be welcomed by one of our team members when you check in, our hotel is focused on the well-being of our staff – ensuring they are healthy. They are instructed to not come to work if they are not well – and if they question their health, we ask that they take their temperature and verify they are well. We have frequent wellness and safety training and we stress the importance of wellness and strict adherence to our safety protocols. Importantly, we value their health as well as yours – you can take comfort in knowing that our caring staff recognize the importance of their health before they interact with you.

Second, we know that most of your time with us will be spent in your guest room. Prior to your stay, your room will be sanitized, disinfected and closely inspected. Every guest room high touch point will be cleaned with chemicals aimed at killing the COVID-19 virus – door handles, light switches, thermostats, desk areas, hangers, television remotes, alarm clocks, coffee makers, telephones and all bathroom fixture handles and touch points. Where you touch – it will have been cleaned with a focus on your safety. Hotel housekeepers will wear gloves and masks to ensure your safety as well as theirs. Of note, the room you stay in will have not been used for a period of 72 hours from the prior guest – a form of social distancing related to the life expectancy of the COVID-19 virus. Prior to your walking through the door to your room, all linens and terrycloth products will have been washed in chemicals aimed at killing the virus, and at a high-heat temperature at which it cannot survive. Separate laundry carts are used for clean linens and towels to prevent cross-contamination, and all laundry carts are disinfected daily. All laundry facilities and equipment are routinely inspected with only approved cleaning chemicals used. Additionally, knowing you want to practice safe social distancing, stay-over service will not be provided unless specifically requested – and if requested the guest must leave the room. If you request clean and towels, they will be provided through minimum personal contact – we can leave them in the room when you are not there.

Third, while we recognize the importance of providing you a quality breakfast when you stay with us, we have implemented a breakfast program that ensures the food you receive is safe and healthy. [Option 1: We have implemented a “Grab & Go” program that allows you to take a pre-packaged breakfast back to your room to eat – allowing you to social distance yet enjoy a complimentary breakfast.] [Option 2: We are providing a “served” breakfast so that you do not have to obtain your food in a “buffet style setting.”] Importantly, breakfast area tables and chairs are sanitized whenever used. Our promise to you is to provide a quality breakfast while respecting that your safety and well-being are paramount.

Fourth, public restrooms and fitness center – will be cleaned on closely-monitored schedules using disinfecting chemicals. Fitness equipment will be cleaned with a disinfectant after each use. Every evening, these areas will be sanitized as we are focused on your health and well-being and the fitness center will be closed on Sundays for deep cleaning.

With regard to our meeting space, all chairs, tables and equipment are sanitized before and after each use and we will recommend that anyone using the room practice social distancing if the meeting should be conducted.

We stand ready to provide you a safe, clean home away from home as cleaning is the new standard.

Thank you for the privilege of sharing our hotel with you.
